South Kent, Connecticut

SIZE

2,200 SF

COMPLETED

2020

AWARDS

2022 Excellence, Design Award, AIA CT

2020 Residential Design Award, BSA with AIA New York

Mount Mauwee House, located on the highest peak in South Kent, Connecticut, is designed to resemble a low, single story brick building, taking inspiration from traditional colonial-era homes that are built of masonry, have large eaves, and a second story built inside the roof. The residence features glass corners and sliding-glass doors, a broad roof extending out to cover a patio on one side, and consists of two stories tucked inside the standing-seam metal roof. The roof is constructed of 63 unique trusses that structurally shape pockets of light-filled spaces and openings on the upper floor.

Altieri designed HVAC, electrical, and plumbing systems for the newly constructed 2,200 SF house.
