

Altieri

BISCAYNE BAY

ARCHITECT

Bohlin Cwyinski Jackson

LOCATION

Miami Beach, Florida

SIZE

5,192 SF

COMPLETED

2018

Located on an island in Biscayne Bay, this private residence is a reinterpretation of the regional post-war Miami Modernist architecture movement. The house was designed to fit within a narrow, wedge-shaped site and organized to provide framed views of the water and Miami Beach skyline.

Altieri designed HVAC, electrical, and plumbing systems for the newly constructed 5192 SF house including a variable refrigerant flow (VRF) system, segregation of systems based on program and occupancy, and emergency power.
